## INTRODUCTION

GBT is a leading supplier of high-quality Building materials, in particular, the thermal insulated systems solutions for Facades, providing to the construction industry's growing demand for energy-efficient solutions...

The company has been continually innovating and developing forth, always adhering to customers' needs as the guide, providing them with higher quality products and services, and writing a bright chapter that belongs to us.

With a commitment to sustainability, innovation, and customer fulfillment, we specialize in offering a wide range of thermal insulation Finishing systems designed to provide weather protection in selection of shapes, colours and textures that can replicate almost any architectural style or finish material, or stand by itself as an architectural feature, our systems will reduce energy consumption by 30-55%, and condensation on walls and ceilings is virtually eliminated, with aesthetic and flexible design to meet all our customer's needs.

## Core Values:

**1. Quality Assurance:** Ensuring that our products and systems solutions meet the premier industry standards for performance, durability, and competence.

**2. Sustainability:** Providing eco-friendly insulation solutions that help reduce carbon footprint, improve energy efficiency, and contribute to ecological building practices.

**3. Innovation:** Seeking new and advanced technologies to deliver advanced solutions that meet the evolving needs of the construction industry.

# ABOUT US!

**GBT is a dynamic and innovative building materials trading company established to meet the evolving needs of the construction industry.**

We specialize in supplying high-quality building materials, from essential raw materials to premium finishing products, catering to both residential and commercial projects.

Our mission is to provide top-tier products that ensure durability, sustainability, and cost-efficiency for builders and contractors. We work closely with trusted manufacturers and suppliers to guarantee the highest standards of quality and reliability. Whether you are a contractor, architect, or developer, we are committed to delivering the materials you need on time, every time.

**At GBT,** we believe in fostering long-term relationships through exceptional service, competitive pricing, and expert industry knowledge. Our team is dedicated to understanding your project needs and providing personalized solutions to help bring your vision to life.

With our commitment to excellence, innovation, customer satisfaction and delivering high-quality products, we have established ourselves as a reliable source in the construction industry.

We specialized in thermal insulation finishing systems which play a vital role in promoting energy efficiency, comfort, and sustainability in the building industry.

By providing high-quality insulation finishing systems solutions, technical expertise, and tailored solutions, **GBT** company contributes to the success of building projects and the overall advancement of green building practices.

In addition to insulation finishing systems, **GBT** offers a full range of accessories such as corner beads, tapes, sealants, and fasteners to facilitate the installation and effectiveness of insulation finishing systems.

As we grow, we aim to be a trusted partner in the construction supply chain, ensuring that every project, no matter the size, has access to the best materials and systems solutions in the market.

## OUR VISION

To be the leading provider of **innovative and sustainable thermal insulation solutions**, setting the standard for energy-efficient building materials in the industry.

## OUR GOALS

Our goal is to empower communities by harnessing the inherent power of insulated materials to solve today's problems. One of the most plentiful natural resources on Earth is used to make insulation materials, which has superior thermal and acoustic qualities. While preserving resources, it raises building standards, reduces emissions, and enhances infrastructure.

## OUR MISSION

1

**Provide Innovative Solutions:** We strive to offer cutting-edge thermal insulation Façade systems that meet the evolving needs of the construction industry, ensuring energy efficiency and environmental sustainability in building projects.

2

**Provide High Quality Products:** We committed to provide high quality, affordable building materials that support sustainable construction, helping our clients complete their projects on time and within budget.

3

**Ensure Customer Satisfaction:** We are committed to understanding our customers' requirements and delivering tailored solutions that meet their specific needs. Our focus on customer satisfaction drives us to provide exceptional service, reliable products, and expert guidance.

4

**Foster Partnerships:** Building strong partnerships with manufacturers, suppliers, contractors, and clients is essential to our success. We believe in collaborative relationships that drive mutual growth and success in the construction sector.

# WHY CHOOSE US!

We realize that knowing how to build a successful relationship with our clients is extremely important. Our dedication to excellent customer satisfaction has been one of the keys to our success. When choosing a supplier, there are a plethora of different qualities to consider.

01

## Expertise

With years of experience in the industry, GBT has in-depth knowledge and expertise in thermal insulation finishing solutions, offering reliable advice and support to our clients.

02

## Quality Assurance

We work with reputable manufacturers and suppliers to source high-quality building materials and systems that meet international standards for performance and environmental sustainability.

03

## Customer-Centric Approach

Our dedicated team is committed to providing exceptional customer service, from product selection to delivery, ensuring a smooth and satisfactory experience for our clients.

04

## Sustainability Focus

By promoting energy-efficient and sustainable building practices, we contribute to a greener future and help our clients achieve their sustainability goals.

# OUR SERVICES

**GBT** encompasses a wide range of services necessary for the construction, renovation, and maintenance of buildings and infrastructure.

## 1 Building Materials Trading

Our Sales Team consists of passionate professionals, committed to delivering exceptional results and building lasting relationships within the construction industry.

Their primary responsibility is to drive growth, build strong client relationships, and contribute to achieving the company targets.

## 2 Technical Services

We bring our accumulated knowledge to our customer's projects by offering technical services to support our market-leading products.

Our technical support team is formed of experienced staff that support you on-site from the onset of site trials and mock-ups, through testing and seminars which covers theoretical and practical training for clients, engineers, and applicators.

## 3 Thermal Insulation Finishing Solutions - EIFS

EnergyShield Exterior Insulation and Finish Systems are highly decorative, multi layered insulating and protective finish systems for exterior walls.

EIFS are the only exterior wall covering that insulate and provide weather protection in selection of shapes, colours and textures that can replicate almost any architectural style or finish material, or stand by itself as an architectural feature. Our EIFS are:

- Environmentally friendly.
- insulating and therefore energy saving.
- flexible in design.
- sustainable.
- Aesthetics.
- Unlimited design flexibility.

# OUR PRODUCTS

## 1- CONCRETE REPAIR & PROTECTION SYSTEM

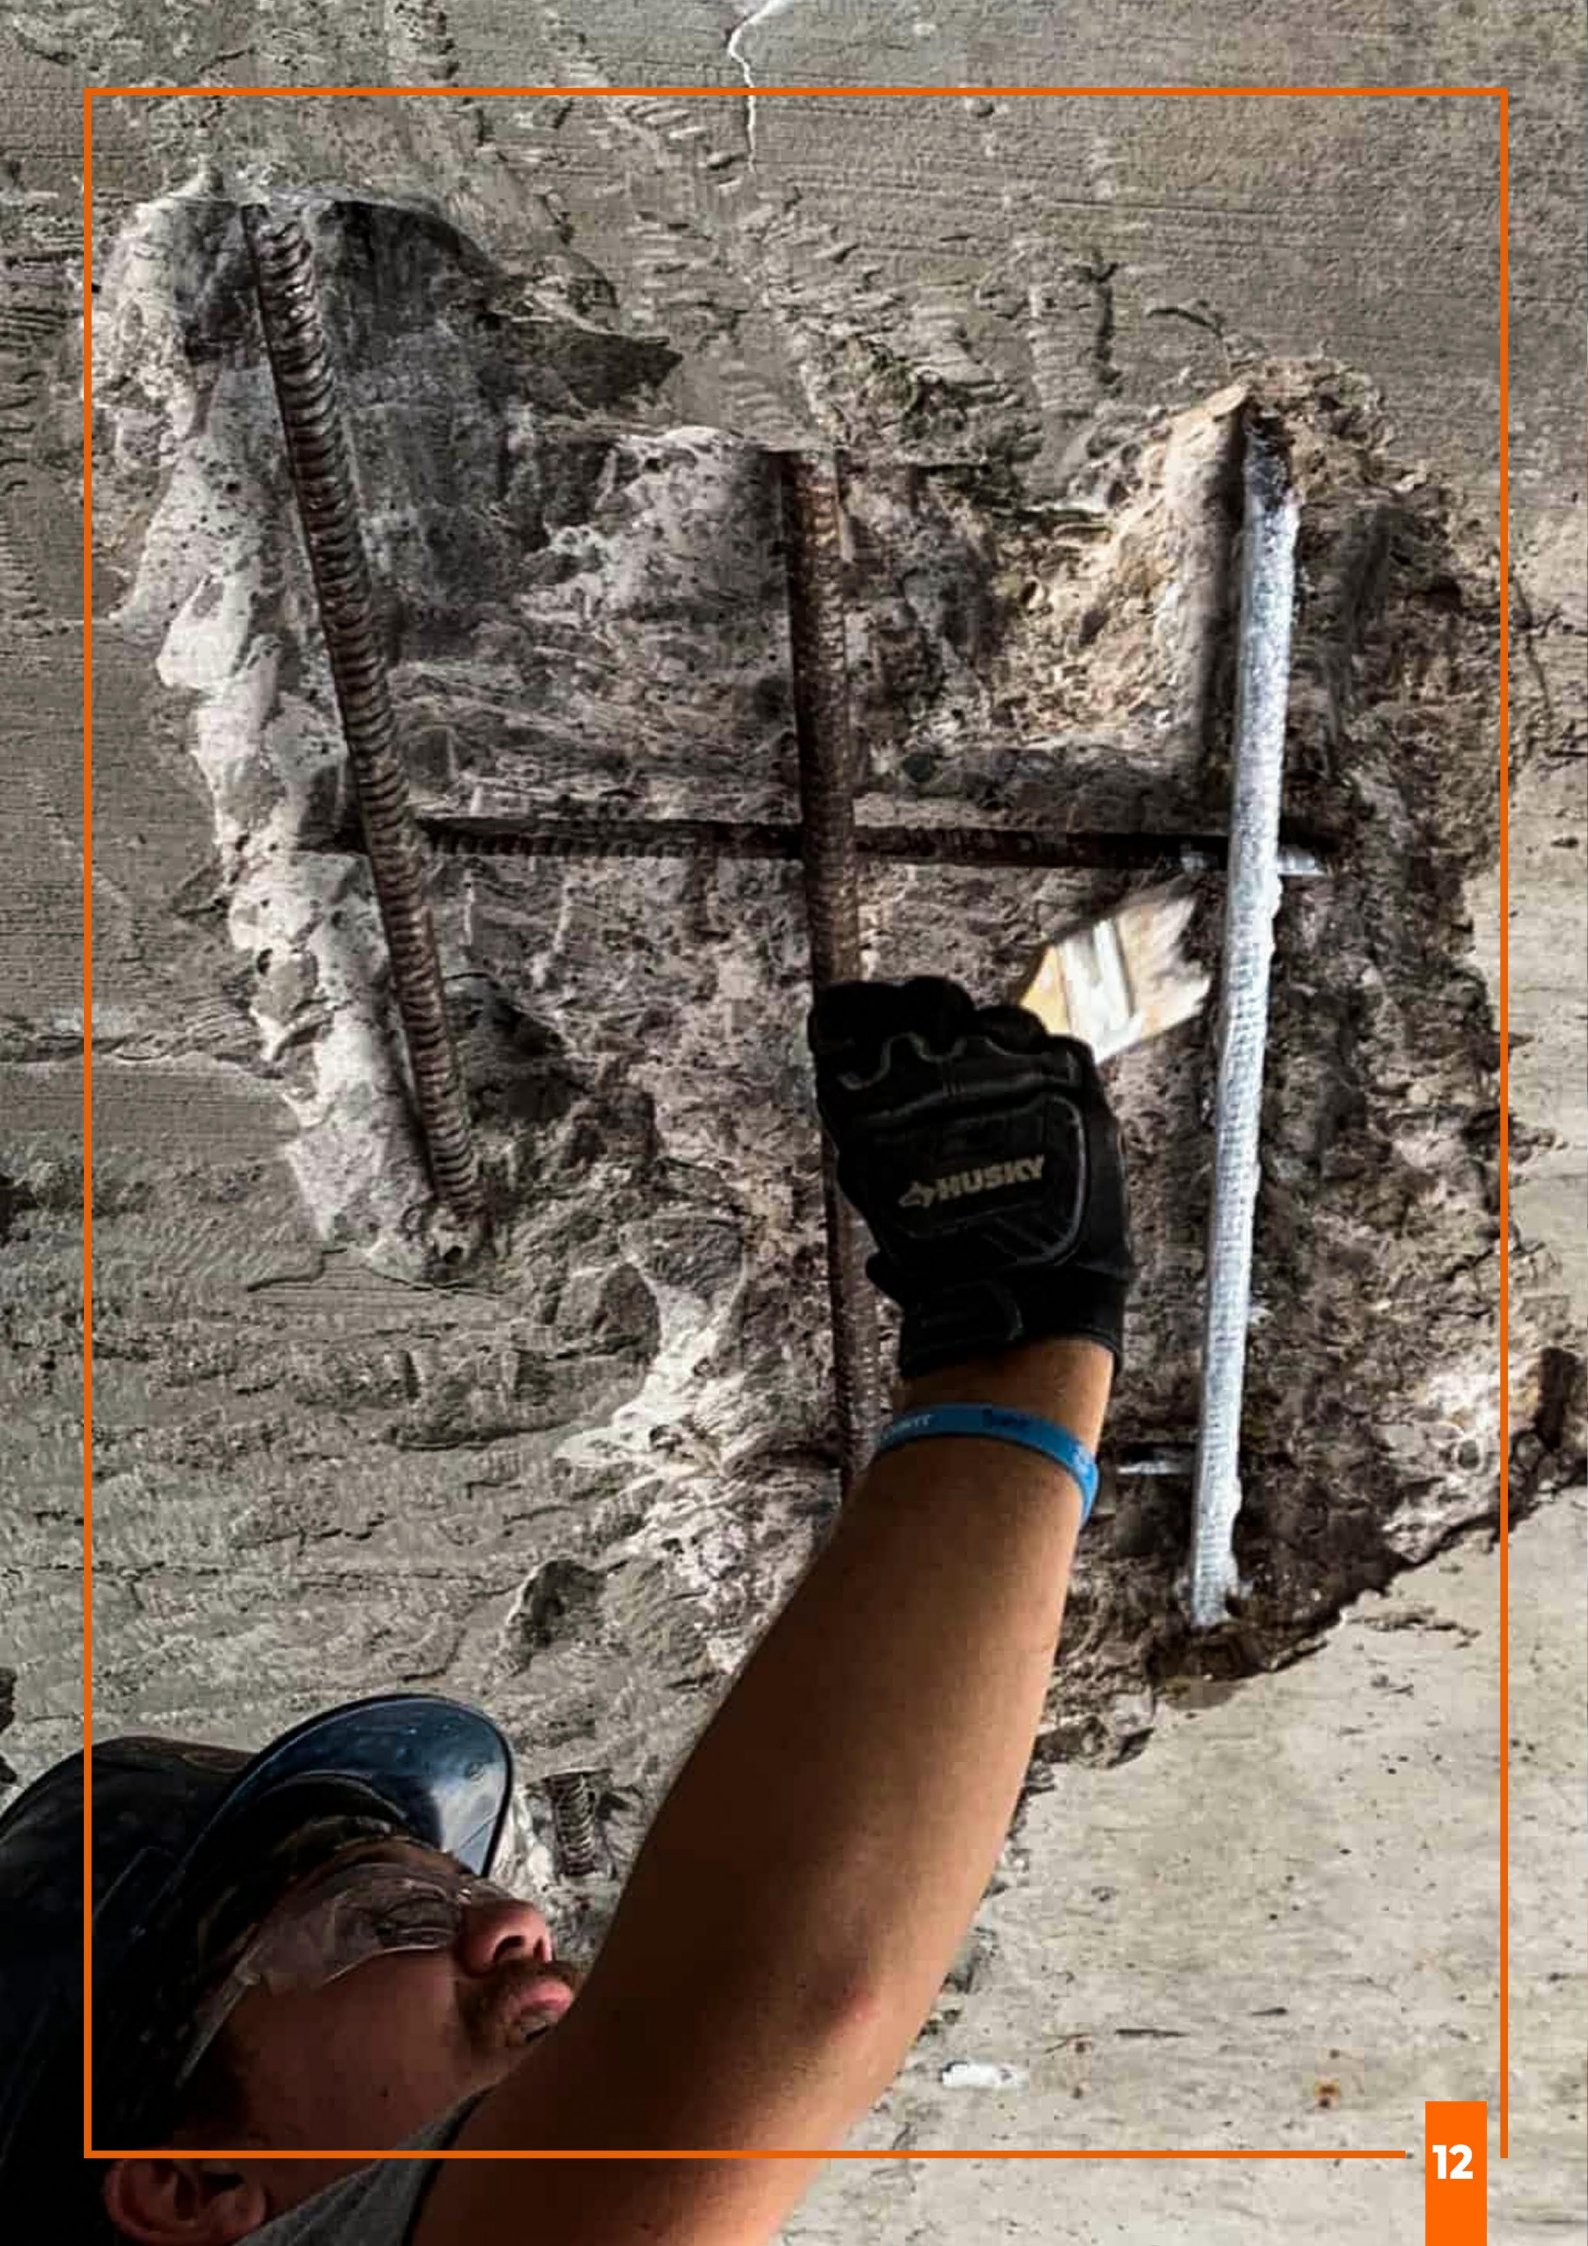

**GBT** is a trusted provider of advanced concrete repair and protection systems, committed to enhancing the durability and longevity of concrete structures. With a focus on innovation, quality, and sustainability, we offer a broad range of products and services designed to address concrete deterioration, protect against environmental factors, and extend the lifespan of concrete assets.

### OUR PRODUCT RANGE:

- 1 Single component cementitious blowhole filler and leveling mortar for cosmetic repairs 0-3mm.
- 2 Single component, high strength fiber reinforced structural repair mortar at 10-40mm thickness.
- 3 Single component High strength, shrinkage compensated micro concrete at 25-150mm thickness.
- 4 Elastomeric, crack bridging, waterproof and anti-carbonation coating for concrete and masonry.
- 5 Coal tar extended epoxy coating to protect marine and waste water handling structures.
- 6 Single component eco-friendly high build hydrophobic coating for foundations.

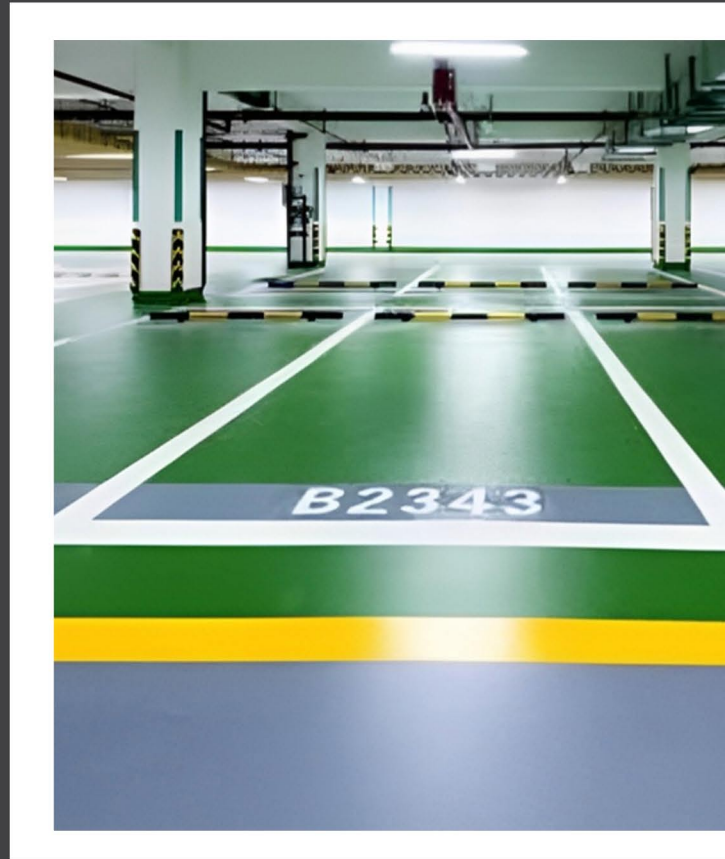

# OUR PRODUCTS

## 2-FLOORING SYSTEMS

Ultra range of high performance and decorative cementitious, epoxy, and polyurethane industrial and commercial flooring products, have been designed to sustain even toughest environments.

## OUR PRODUCT RANGE:

---

- 1 Epoxy floor coating systems.
- 2 Polyurethane floor coating systems.
- 3 Decorative floor.
- 4 Cementitious floor system and underlayment.
- 5 Floor sealer.

# OUR PRODUCTS

## 3-WATERPROOFING SOLUTIONS

Sustainability of key resources is one of the fundamental principles within our company. And effective water management has been identified to support our future health and prosperity. The range of waterproofing products and systems provides high-performance features and compliance with international standards required for use within the water management sector.

## OUR PRODUCT RANGE:

- 1 Below ground waterproofing system.
- 2 Above ground waterproofing system.
  - ↳ Wet areas waterproofing.
  - ↳ Water industry waterproofing.
  - ↳ Roof/Podium deck waterproofing.

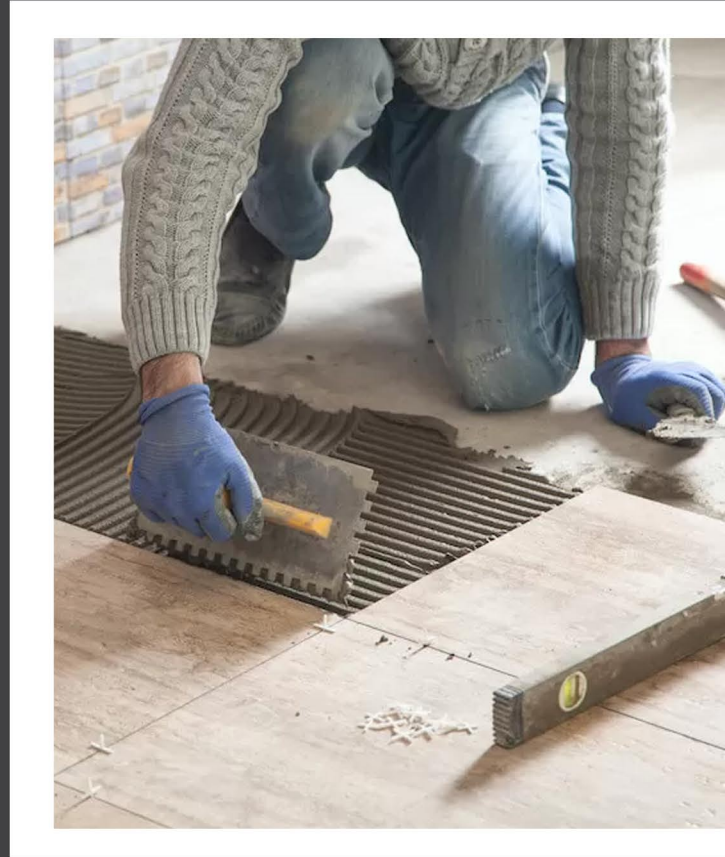

# OUR PRODUCTS

## 4- TILLING

Our wide range of tile adhesives and tile grouts are manufactured to the highest quality standards backed by independent test certificates providing long lasting solution for fixing of tiles.

Whether fixing ceramic tiles, vitrified tiles, natural stones indoors or outdoors, tiling to residential and commercial projects or large infrastructure projects or even underwater fixing, **GBT** is the likely choice assisting you with expert technical advice and guidance in selecting the right adhesive solution for fixing of tiles to meet your specific needs.

## OUR PRODUCT RANGE:

### 1 Polymer based cementitious tile adhesive range:

- ↳ Used for internal/external vertical & horizontal applications for all types of floor tiles and ceramic wall including:
  - Porcelain, vitrified tiles & cement terrazzo.
  - Ceramic mosaics, quarry tiles, dark natural stone, terrazzo and brick slips.

### 2 Epoxy based tiles adhesive and grout:

- ↳ - For chemical resistant, waterproof, quarry and ceramic tiles to concrete or steel.

# OUR PRODUCTS

## 5- WALL SYSTEM (EIFS)

Integrated system components include adhesive, insulation board, reinforced base coat and **100%** acrylic polymer primer and finish. Apply the system directly to the following acceptable substrates cement board, poured concrete/unit masonry and certain gypsum boards.

Finishes are available in a limitless color selection and offer performance enhancement options, including increased resistance to dirt pickup and mildew.

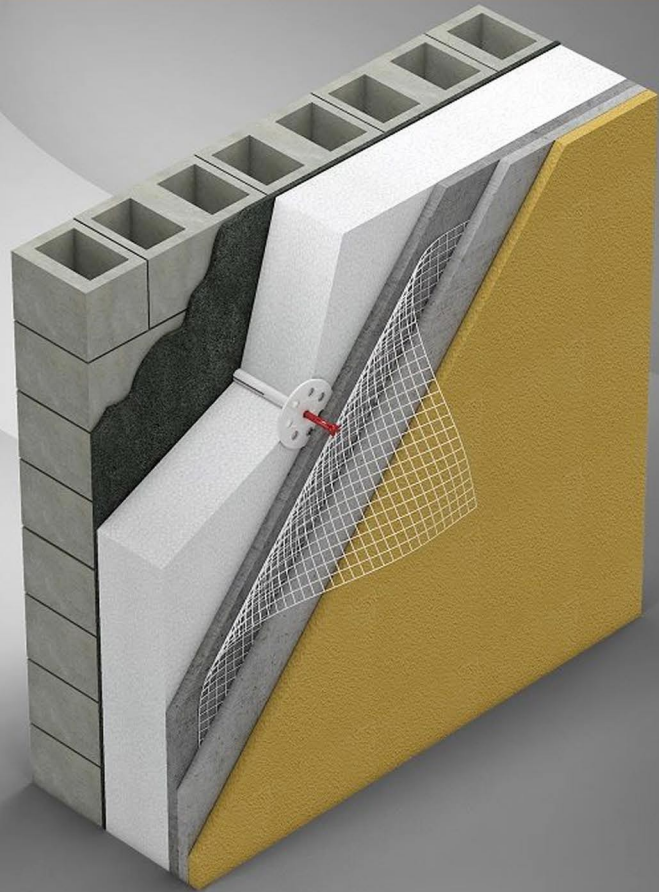

## OUR PRODUCT RANGE:

### 1 Energy Shield Classic PB Wall System

- ↳ - Ultra Bond: Dry-mix polymer adhesive for insulation board.
- ↳ -Ultra Base Coat: Dry-mix polymer adhesive and base coat.
- ↳ -Reinforcing Mesh Standard - ES49: Fiber reinforcing mesh for Exterior Insulation and Finish System – 160 gm/m2.
- ↳ -Reinforcing Mesh Hi Impact – PZ30: Fiber reinforcing mesh for Exterior Insulation and Finish System – 330 gm/m2.
- ↳ -Deco Primer: 100% acrylic-based primer.
- ↳ -EnergyShield Finishes: 100% acrylic polymer finishes. High-quality trowel grade textured coating is pre-colored, pre-textured.

## COMPANY PROFILE

Dedicated to providing quality, technical services and innovated solutions, we strive to implement a long term relationship with our clients.

**At GBT**, we are committed to helping businesses optimize incorporating sustainable design practices since green building techniques has become increasingly important in commercial construction. This includes using energy-efficient solutions, implementing renewable energy systems, optimizing natural lighting, and incorporating eco-friendly technologies to reduce the environmental impact of buildings.
